

**Protection Pros**  
DISINFECTING SERVICES

## **Customer Checklist**

*Please ensure that this checklist is completed PRIOR to your scheduled disinfecting treatment. If not complete, our technicians may not be able to complete the service and we will have to cancel your appointment.*

***You will still be responsible for payment of the missed services!***

- Complete your standard cleaning process. Our technicians will NOT clean, only apply the disinfecting solution. It is most effective on clean surfaces and we can not guarantee our treatment if you have not cleaned.
- Open cupboards and drawers so that items inside will receive the disinfection solution as well. If things are closed, we will assume that you do not want items inside to be disinfected.
- Unplug your electronics. The solution is safe on electronics, but to be on the safe side, it is recommended that you unplug them. Again, our technicians will not unplug things for you, so if electronics are still plugged in, they will assume that you wanted them that way.
- Ensure there is someone on location to let the technicians in at your scheduled appointment time. If no one is available, be sure to make arrangements for our technicians to access the property PRIOR to their arrival.
- Once the solution has been applied, allow to dry completely for maximum effectiveness. This typically only takes about 10 minutes or less.

*Failure to complete any of these steps will void any guarantee of the effectiveness of the disinfection treatment and may lead to cancellation of the appointment.*

***Payment for the missed appointment will still be required.***
